

TECHNICAL WORK GROUP

CALL FOR PARTICIPANTS

Join SACA and CESMII to validate new nationally-recognized certifications for smart manufacturing

The Smart Automation Certification Alliance (SACA) has partnered with CESMII to develop certification standards for Smart Manufacturing in **Smart Manufacturing OT-IT Integration and Semi-Autonomous Intelligence**.

Now, industry experts are needed to validate these standards. This is an opportunity for your organization to have input on the skills and competencies needed for today's smart manufacturing workforce.

Your input will be used to create nationally-recognized, occupation-driven certifications. Schools and training programs will use these standards to guide their Industry 4.0, IIoT, and artificial intelligence programs.

Additionally, SACA will seek your feedback on future needs of industry and technology trends that will help shape their strategy moving forward.

BENEFITS OF PARTICIPATING

- Recognition as a national leader in smart manufacturing, IIoT, and AI
- Gain first access to state-of-the-industry skills standards
- Ensure your company's skill needs are addressed by a nationally-recognized certification

APRIL 16, 2026
10 AM - 2 PM

Rockwell Automation
1201 S. 2nd Street
Milwaukee, WI 53204
